

## Information sheet

Information on accessories for process connections  
Weld-in sleeves, adapters and gaskets

**EN-US**

## General information

- Baumer offers certified weld-in sleeves for an optimally hygienic process connection. Observe the following information during installation:
  - The welding may only be performed by authorized persons who have a valid welder test certificate.
  - Use a welding mandrel that is also available as an accessory. This dissipates heat and thereby prevents warping.
  - Welding mandrels with a metal sealing edge must not be reworked in the area of the sealing edge. A screwed-in welding mandrel also provides protection. Pay attention to this especially during polishing.
- To ensure a hygienic installation, follow the applicable 3-A hygiene standards or EHEDG guidelines. For more information, visit:
  - <https://www.3-a.org>
  - <https://www.ehedg.org>
- When selecting seals, make sure that the seal material is resistant to the media and temperatures used.
- Only use original accessories from Baumer. The current accessories portfolio is found at [www.baumer.com](http://www.baumer.com).
- The Baumer Connection Identifier (BCID) helps you find suitable accessories (welding mandrels, adapters, and seals). Sensors, process connections, and accessories with the same BCID code always match.
