AX smart cameras – canvas for your ideas

The perfect image processing platform

AI ready

NVIDIA.

Get your AI applications solved

Need an AI solution?

Meet one of our software partners to **solve** your application.

Have an AI partner?

Bring your own software partner to build a solution on the **freely programmable** AX smart cameras.

Inhouse AI?

Build your custom vision system with our **open** AX smart camera.

You are an AI specialist?

Become a partner, get in contact with us! We are **always happy** to meet new AI software professionals!

Simple

- **All-in-one** smart camera based on NVIDIA® JETSON™ technology and Sony® Pregius™ sensors

- **Reduces development time** for your project

Powerful

- **Enough power** for 300 fps interference or multiple neural networks

- **NVIDIA® platform** with 6 ARM® cores and **up to 16 GB** high bandwidth shared memory

Robust

- **Made to be reliable** even in rough industrial environments

- **Up to IP 67** aluminium housing with industrial M12 connectors

Open

- Provides a canvas to **project your own software** ideas on a ready-to-use industrial hardware platform

- **Full access** to the Linux® OS to bring your projects to life
